

Installation Instructions

For all models available, first and foremost, make sure your gun is clear of all ammunition and in a safe condition.

Always wear safety glasses when working on your gun. Please read ALL instructions before beginning.

1. Following the gun's instruction manual, break gun down to the point that you can remove the factory magazine tube.
2. If qualified to do so with proper tools and experience, remove the existing magazine tube. If you are not sure how to do this consult with your local qualified gunsmith. RCI is not responsible for any damage to your gun. It is the owner's responsibility to have part properly removed.

Now that the tube is removed, clean all residual thread tightening agent from receiver threads.

3. Install (end with zip tie) into the receiver after you apply thread tightening agent to the threads on the tube. Cut zip tie and remove. You will hear the follower snap into place.
4. Remove cap and spring from opposing end of tube. Caution spring is under pressure so wear safety glasses and point tube in safe direction when removing follower and spring.
5. Slide both over sleeves off the tube, and re assemble gun. Re-install over sleeves, spring and tube cap. Once tightened your gun is back in service.

XM2BE System has 6 parts.

1. Replacement tube
2. Generic Picatinny Sleeve Over- which has pre drilled holes that can be tapped 10-32 threading to accept 1" Sampson MFG picatinny sections or a standard sling stud.
3. Tube Sleeve Over
4. RCI Performance Enhancing Followers. Anodized 7075 Aluminum
5. Spring
6. Tube Cap.

Congratulations, you are ready to go to the range. Note: a Barrel clamp is not required for this system.

All Roth Concept Innovations ("RCI") products have a 1 year limited warranty. The warranty applies towards defects in materials or workmanship. Any repairs or modifications not done by RCI voids any warranty.

Disclaimer - ALWAYS PRACTICE SAFE FIREARM HANDLING!!! DO NOT POINT GUN AT YOURSELF OR ANYONE ELSE, EVEN WHEN LOADING! KEEP HANDS CLEAR OF BARREL!
